INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/00745

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-6 as originally filed

Claims, No.:

1-9 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/00745

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims 1-9
	No: Claims
Inventive step (IS)	Yes: Claims
	No: Claims 1-9
Industrial applicability (IA)	Yes: Claims 1-6
	No: Claims

2. Citations and explanations **see separate sheet**

Section V

1. Reference is made to the following documents:

D1: US-A-5 532 218 (BARGIOTTI ALBERTO ET AL) 2 July 1996 (1996-07-02)

D2: US-A-5 496 808 (BARGIOTTI ALBERTO ET AL) 5 March 1996 (1996-03-05)

D3: EDER JP ET AL: 'Sequence effect of irinotecan (CPT-11) and topoisomerase II inhibitors in vivo' CANCER CHEMOTHERAPY AND PHARMACOLOGY, DE, SPRINGER VERLAG, BERLIN, vol. 42, no. 4, 1998, pages 327-335,

2. The subject-matter of the present claims appears to be novel over the prior art, since products comprising the two required elements have not been disclosed before (Art 33(2) PCT).
3. The used anthracyclines are however known from D1 and D2 as antineoplastic agents. It is further suggested in D3 to combine antineoplastic agent with inhibitors of topoisomerase and that this combination would have a synergistic activity. For the skilled person it appears to be obvious to combine the teachings of D1 or D2 with D3 and arrive at the subject-matter of the present claims, i.e. the requirements of Article 33 (3) PCT have not been fulfilled.
It is pointed out that not even a synergistic effect can provide evidence for an inventive step, since this effect has been suggested in D3.
4. For the assessment of the present claims 7-9 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP00/00745

I. Basis of the report

1. With regard to the **elements** of the international application (*Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)*):

Description, pages:

1-6 as originally filed

Claims, No.:

1-9 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:
- ☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/00745

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	1-9
	No:	Claims	
Inventive step (IS)	Yes:	Claims	
	No:	Claims	1-9
Industrial applicability (IA)	Yes:	Claims	1-6
	No:	Claims	

2. Citations and explanations
see separate sheet

Section V

1. Reference is made to the following documents:

D1: US-A-5 532 218 (BARGIOTTI ALBERTO ET AL) 2 July 1996 (1996-07-02)

D2: US-A-5 496 808 (BARGIOTTI ALBERTO ET AL) 5 March 1996 (1996-03-05)

D3: EDER JP ET AL: 'Sequence effect of irinotecan (CPT-11) and topoisomerase II inhibitors in vivo' CANCER CHEMOTHERAPY AND PHARMACOLOGY, DE, SPRINGER VERLAG, BERLIN, vol. 42, no. 4, 1998, pages 327-335,

2. The subject-matter of the present claims appears to be novel over the prior art, since products comprising the two required elements have not been disclosed before (Art 33(2) PCT).
3. The used anthracyclines are however known from D1 and D2 as antineoplastic agents. It is further suggested in D3 to combine antineoplastic agent with inhibitors of topoisomerase and that this combination would have a synergistic activity. For the skilled person it appears to be obvious to combine the teachings of D1 or D2 with D3 and arrive at the subject-matter of the present claims, i.e. the requirements of Article 33 (3) PCT have not been fulfilled. It is pointed out that not even a synergistic effect can provide evidence for an inventive step, since this effect has been suggested in D3.
4. For the assessment of the present claims 7-9 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
